

NEW MINI MAX PORTABLE SATELLITE SYSTEM FOR RV OWNERS

The new Mini Max portable satellite system for RV owners sits directly on the ground and features its own triangular base so it does not need to go on a tripod. It can be used for free to air TV & Radio or for Pay TV. The unit folds into its own bag for easy storage and weighs only 4kg. The bag also has pouches for storage of the satellite equipment.

The Pay TV kit includes:

- 65cm or if preferred a 75cm mini max dish
- Engraved LNB, padded bag
- 15m/6m/1.5m coax cable
- Digital satellite finder
- Liquid filled compass
- External weatherproof wall plate
- Instruction manual and pegs for the dish

For free to air the full kit includes a VAST UEC 4121 decoder (only avail in 240v but can be run on a small inverter) and VAST smartcard.

PORTABLE SATELLITE KIT WITH TRIPOD

Free to air satellite kit includes:

- 74cm dish with detachable arm for ease of storage
- Engraved LNB
- VAST UEC 4121 decoder (only avail in 240v but can be run on a small inverter)
- VAST smartcard
- Steel tripod with individual adjustable legs and inbuilt level bubble
- Digi 7 digital satellite finder and compass
- 3 lengths of coax cable, plus through wall fitting
- Instruction manual

Pay TV kit also available in this model.

SATELLITE FREE TO AIR TV FOR TRAVELLERS

Travellers can now enjoy a greater range of satellite TV channels available through the new VAST system.

The Mini Max portable VAST kit can be supplied with a 65cm or 75cm dish. The 65cm will give you good performance in most of Australia while the 75cm will give you good all round coverage.

There is a simple procedure in place for travellers to register the smartcard for temporary access (6 months at a time) online and with no ongoing fees.

The card can be reactivated an infinite number of times so you'll have permanent access if needed.

The Mini Max VAST kit comes with full instructions on complete set-up and how to go about activating your card.

For travellers that previously purchased the Optus system (this will be phased out at the end of 2013) you can now upgrade your system simply by purchasing the new VAST decoder and card. The current decoder will not accept the VAST smartcard you need the VAST decoder. Activation registration and further information is available at www.mysatv.com.au.

Price depends on your location. Please complete the Enquiry Form for pricing in your area.

After we receive your **ENQUIRY**, we will phone to confirm **PRICE** and arrange your preferred method of payment and delivery. We accept these Credit Cards over the phone.
