

NEW MINI MAX PORTABLE SATELLITE SYSTEM FOR RV OWNERS

The new Mini Max portable satellite system for RV owners sits directly on the ground and features its own triangular base so it does not need to go on a tripod. It can be used for free to air TV & Radio or for Pay TV. The unit folds into its own bag for easy storage and weighs only 4kg. The bag also has pouches for storage of the satellite equipment.

The Pay TV kit includes:

- 65cm or if preferred a 75cm mini max dish
- Engraved LNB, padded bag
- 15m/6m/1.5m coax cable
- Digital satellite finder
- Liquid filled compass
- External weatherproof wall plate
- Instruction manual and pegs for the dish

For free to air the full kit includes a Strong 4664X 12/240volt decoder and Optus Smartcard.

PORTABLE SATELLITE KIT WITH TRIPOD

Free to air satellite kit includes:

- 74cm dish with detachable arm for ease of storage
- Engraved LNB
- Strong 4664X decoder which can run on 12/240volt with USB port
- Optus smartcard
- Steel tripod with individual adjustable legs and inbuilt level bubble
- Digi 7 digital satellite finder and compass
- 3 lengths of coax cable, plus through wall fitting
- Instruction manual

Pay TV kit also available in this model.

*Customer support number included on manual.
